The Fantail / pīwakawaka

Fantails are small insectivorous birds of Australasia, Southeast Asia and the Indian subcontinent belonging to the genus *Rhipidura* in the family Rhipiduridae. Most of the species are about 15 to 18 cm

Black Robin / toutouwai

The black robin or Chatham Island robin (*Petroica traversi*) is an endangered bird from the Chatham Islands off the east coast of New Zealand. It is closely related to the South Island robin (*P. australis*). It was

Plastic bag floats in the ocean

Saw a plastic bag floating in the ocean and a turtle tried to eat it because it confused it with food I think?

Spotted Coke bottle on Long Bay beach

Some people left there
plastic bottle on the beach.
Why do they do that?
